

## E-Z STACK PAD

### Submittal Information

Part No. 18042S-18074BS  
 Document No. SPEC18042S  
 Date 2024-03-28  
 Revision 09

### General Properties

- Material: PP (Polypropylene)
- Finish: Gray, Black
- Recommended temperature range: -25°F to 180°F
- Standard: ASTM D2299
- Application: Air conditioner outdoor units, Other lightweight equipment, etc.

### Specification

Item No.	Size (Inch.)	Part Size (Inch.)					Designed Load (lbs/kgs)	Max Load (lbs/kgs)	Corresponding Units	Std. Pkg.	U/M

### Features

- The excellent one-piece structure design makes the bottom surface have more contact with the ground, making the product not easy to sink.
- Sturdy stiffener rib design enables the product to have better load-bearing performance, which can meet the needs of most air conditioners on the market.
- Offers vibration, fire, and noise resistance, along with UV, weather, chemical, and insect resistance.
- The special texture on the surface makes the product have a non-slip effect.
- Hole-free design prevents the equipment from operating normally due to weeds growing upwards.
- Nestable design reduces storage space and transportation costs.

### Installation Tips

- When using this product outdoors, place it on a flat foundation of dirt or small gravel, to reduce the impact of vibration on the operation of the equipment.
- Although this product has flame-retardant properties, it is best to keep this product away from the open flame. Long-term exposure to the open flame will cause the product to deform and affect the function of the product.
